Erika Kvikstad

(She/her)

What do you do ?

Accelerate healthcare innovation with tools, teams, and tech

Geographies & timelines

2025 - Present

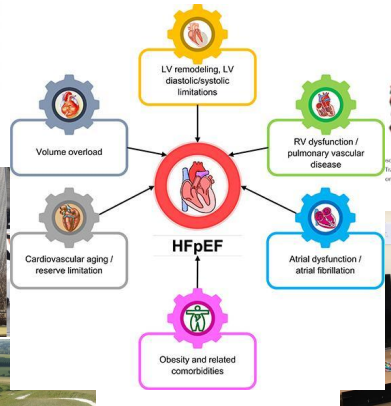

Fractional Science Strategy, Data Translation

What/who inspires you?

Family, community, teachers, friends, mentors, colleagues

What are you passionate about?

Travel, Diversity/Inclusion, STEAM, Outreach, all things geek

The difficult journey from a biological idea to a patient

10–15 years
from discovery to approval

~$1 billion
per approved drug[1]

of clinical candidates in Phase I reach first approval[2]

A long, costly, and high-attrition process—
leaving many promising ideas, and many patients, without new treatment options.

1. Commonly cited industry estimate; definitions and methodologies vary.
2. ~14.3% average probability of first approval for clinical candidates entering Phase I (analysis of 18 pharmaceutical companies, 2025).

We can build a better drug discovery process

Two questions on the path to better medicines
